

MOBILE HOME SKIRT ANCHOR MOUNTING BRACKET

ABSTRACT OF THE DISCLOSURE

- Mobile home skirt anchor mounting brackets permit standard 2 by 4s to be mounted on the front portion of a common cinderblock to provide a continuous surface to anchor skirting on mobile homes. A top member 12 has one side of a first downward flange attached to one end and one side of a second downward flange attached to its opposing end. A horizontal flange connects one side of a vertical flange to the opposing side of the second downward flange. Fastening holes are present in the middle of the vertical flange. The first downward flange, top member, and second downward flange are adapted to be seated over the top of a cinderblock.
- 10 The second downward flange, horizontal flange, and vertical flange are adapted to mount the ends of a pair of adjacent 2 by 4s.
